

## Dosage Form Examples

**Capsules** – extended release formulations

**Dauber Bottle** – ideal for liquid preparations

**Emollient Cream** – helpful for dermatological conditions

**Gummy Gels** – chewable forms are great with kids ☺

### Inhalation Devices

**Lip Balm Applicators** – super for “spot” application

**Lollipops** – convenient dosage form for extended delivery and local effect ☺

### Ophthalmic Preparations

**Oral Syringes** – improve dosing accuracy

### Otic Medications

**PLO Transdermal Gel** – great alternative to oral forms

**Popsicles** – great alternative, especially during summer ☺

**Troches** – “lozenges” that dissolve in the mouth
